الفرقة/المستوى Diploma's program, specialty course:	اسم المقرر: Family Planning & Gynecologic nursing	الرمز الكودي 603Ns501
60 ساعة عملی.....	عدد الوحدات الدراسية: نظری 30 ساعة	التخصص: Obstetric & Gynecology Nursing

<p>The course is developed to provide post graduate nursing students with necessary updates knowledge skills related to gynecology and family planning, to integrate this knowledge into their clinical practices. This will enable the students to provide high quality care for women who suffer from common gynecological disorders and women who seeks family planning services.</p>	2. هدف المقرر
<p>a.1. Comprehend the population problem. a.2. Describe F.P. Programs. a.3.Study F.P. benefits a.4. Enumerate contraceptive methods. a.5.Discuss monilial & trichomonous infections a.6.Identify different gynecological symptoms</p>	3. المستهدف من تدريس المقرر: أ- المعلومات والمفاهيم

<p>a.7. Explain different gynecological procedures.</p>	
<p>b.1. Interview clients about different contraceptive methods. b.2. Counsel clients about different contraceptive methods. b.3. Interview gynecological patients. b.4. Counsel gynecological patients. b.5. Identify different gynecological symptoms. b.6. Differentiate between monilial and trichomonous infection. b.7. Develop a nursing care plan for gynecological patients</p>	<p>ب. المهارات الذهنية</p>
<p>c.1- Perform pelvic examination. c. 2- Prepare equipment for pap. Smear & wet smear. c.3- Perform pap. Smear & wet smear. c.4- Counsel clients for presence of monilial & trich. Infections. c. 5- Examine clients for presence of monilial & trich. Infections. c.4- Apply different skills in providing different contraceptive methods Including IUD – insertion & removal. c.6- Apply nursing care plan for gynecological patients. c.7-Conduct interview/ counseling sessions for gynecological & F.PClients.</p>	<p>ج. المهارات المهنية الخاصة بالمقرر</p>
<p>d.1-Update computing skills. d.2-Develop appropriate, effective written and oral communication skills. d.3-Demonstrate capacity for self directed learning. d.4–Demonstrate the ability to work effectively as a part of the group.</p>	<p>د. المهارات العامة</p>

A Family planning

-Population problems globally & in Egypt, F.P program strategy, F.P. Definition, benefits, Activities, midwives role.

-Contraceptive methods: (meaning of contraception, criteria of a good contraceptive method)

Methods :

-Hormonal.

-Mechanical.

-Physiological.

-Chemical.

-Surgical

-Pelvic examination

-monilial & trich infection.

-Pap. Smear & wet seminar.

-Communication skills.

-Principals of interviewing

-Counseling in F.P.

-Clinical F.P. equipments & supplies.

-Infection prevention/ control in F.P clinic & MCH centers

B- Gyne. Nursing

-Gyn.history, common symptoms, exam, investigations, treatments

-Pre & post op. Care of abdominal & vag. Surgery.

-Menstrual disorders.

-Menopause.

-Uterovag, Prolapse & displacements.

-Infertility.

-Genital injuries & fistula

قسم : تمريض أمراض النساء والتوليد
توصيف مقرر دراسي

1- بيانات المقرر

الفرقة/ المستوى: دبلومة	Anatomy of female pelvis اسم المقرر :	603Md02 الرمز الكودي :
عدد الوحدات الدراسية Theoretical: 1Hr/week Practical: -----	التخصص : تمريض أمراض النساء والتوليد	

2- هدف المقرر

This course is designed to provide the students with the Basic essential knowledge about the anatomical structure of female pelvis. The student should acquire the anatomic facts which are mandatory to enhance the nursing skills for maternity nurse.

3- المستهدف من تدريس المقرر:

a.1. Describe the basic anatomical principals of the structure and relations of the different parts of female genital system. a.2. determine female bony pelvis. a.3. Describe pelvic wall muscles and fascia. a.4. Describe pelvic floor muscles. a.5. Recognize the Pelvic peritoneum a.6. Describe anatomy of female external genitalia a.7. label anatomy of female internal genitalia. a.8. Recognize the blood supply & nerve supply of related organs. a.9. Recognize the Urinary bladder a.10. Describe the Rectum a.11. Describe the basic anatomical principals of the structure and relations of the different parts of abdomen and pelvis.	أ- المعلومات والمفاهيم
b.1. Differentiate the bony pelvis. b.2. Identify the muscles and structures related to the bone. b.3. Apply the anatomical facts to reach a proper diagnosis in the living subject. b.4. Interpret some clinical findings in relation to development basis.	ب- المهارات الذهنية
c.1. Obtain the talent of identifying the anatomical land marks related to obstetrics and gynecology. c.2. Use skill lap models to support the knowledge of the female pelvic anatomy. c.3. Demonstrate the applied pelvic anatomy and surface anatomy of the vulva, perineum and the pelvic.	ج- المهارات المهنية الخاصة بالمقرر
d.1. Work effectively in relevant health care delivery settings and systems. d.2. Communicate effectively with the professionals and the staff members of the Obstetric and gynecologic nursing department.	أ- المهارات العامة
1. Pelvic bone 2. Pelvic wall 3. Pelvic floor muscles and connective tissue. 4. Pelvic peritoneum 5. Anatomy of female external genitalia.	4- محتوى المقرر

الفرقة/المستوى Diploma's Specialty	اسم المقرر: Health educationfor woman health	الرمز الكودي603EI09
عملى..... - ساعه	عدد الوحدات الدراسية: نظرى 2ساعه	التخصص: Obstetric& Gynecologic Nursing

The aim of this program are to graduate highly qualified practical nurses who are able to provide evidence – based practice in the field of specialty and to collaborate with members of the health team in a variety of maternity health settings to contribute to the improvement of health and wellness of the women s and their families in the community

2. هدف المقرر

- a.1 Understand adolescent health definition, aim, elements and approaches
- a.2 define premarital period
- a. 3 identify premarital examination
- a. 4 Mention premaritalintervention .
- a.5 List Importance of education during first trimester
- a.6 ListImportance of education during second trimester
- a.7 discuss management of third trimester
- :
- a.8 Identify Common health problems periperium .
- a. 9 list causes of problem during periperum
- a.10 listfactors that contribute to be higher risk of infection

- b.1 Identify relation between menstruation &adolescent.
- b.2 explain the different examination during premarital .
- b.3EnumerateCommon health problems during first trimester
- b.4 Enumerate Common health problems during second trimestler .
- b.5 Analyze the relationship between health problems and third trimester
- b.6 Analyze the interrelationship between health problems and periperium

<p>b.7 Explain menopause</p> <p>b. 8Analyze the interrelationship between health problems and menopause</p>	
<p>c.1. Disseminate information about adolescent</p> <p>c.2 Analyze the different examination during premarital</p> <p>c.3 Investigate the health challenge facing women through first trimester</p> <p>c.4 Investigate the health challenge facing women through second trimester</p> <p>c.5 Investigate the health challenge facing women through third trimester</p> <p>c.6 Investigate different factors that affecting women's health during periperium</p> <p>c.7 Analyze the causes infection during periperium</p> <p>C.8 Investigate how to improve women's health during menopause .</p>

10- هدف المقرر

This course is designed to provide the students with the Basic essential knowledge about the anatomical structure of female pelvis. The student should acquire the anatomic facts which are mandatory to enhance the nursing skills for maternity nurse.

11- المستهدف من تدريس المقرر:

a.1. Describe the basic anatomical principals of the structure and relations of the different parts of female genital system. a.2. Describe female bony pelvis. a.3. Describe pelvic wall muscles and fascia. a.4. Describe pelvic floor muscles. a.5. Recognize the Pelvic peritoneum a.6. Describe anatomy of female external genitalia a.7. Describe anatomy of female internal genitalia. a.8. Recognize the blood supply & nerve supply of related organs. a.9. Recognize the Urinary bladder a.10. Describe the Rectum a.11. Describe the basic anatomical principals of the structure and relations of the different parts of abdomen and pelvis.	ت- المعلومات والمفاهيم
b.1. Differentiate the bony pelvis. b.2. Identify the muscles and structures related to the bone.	ث- المهارات الذهنية

b.3. Apply the anatomical facts to reach a proper diagnosis in the living subject. b.4. Interpret some clinical findings in relation to development basis.	
c.1. Obtain the talent of identifying the anatomical land marks related to obstetrics and gynecology. c.2. Use skill lap models to support the knowledge of the female pelvic anatomy. c.3. Demonstrate the applied pelvic anatomy and surface anatomy of the vulva, perineum and the pelvic.	ج- المهارات المهنية الخاصة بالمقرر
d.1. Work effectively in relevant health care delivery settings and systems. d.2. Communicate effectively with the professionals and the staff members of the Obstetric and gynecologic nursing department.	ب- المهارات العامة
10. Pelvic bone 11. Pelvic wall 12. Pelvic floor muscles and connective tissue. 13. Pelvic peritoneum 14. Anatomy of female external genitalia. 15. Anatomy of the female internal genitalia 16. Blood supply & nerve supply of the pelvic viscera. 17. Urinary bladder 18. Rectum	12- محتوى المقرر
5.1- Illustrated lecture. 5.2. Group discussion. 5.3- Use of computer projector "data show".	13- أساليب التعليم والتعلم

1- بيانات المقرر

الفرقة / المستوى: Master's Program, Specialty Course	اسم المقرر: Midwifery	الرمز الكودي: 703NS08
ساعة عملي 3 ساعة	عدد الوحدات الدراسية: نظري 2 ساعة	التخصص: Obstetric & Gynecologic Nursing

A course designed to prepare master students to manage women during maternity cycle, identify any deviation from normal and make appropriate interventions and /or the necessary referral.

2- هدف المقرر

3- المستهدف من تدريس المقرر:

a. 1. Recognize the basic concepts of the care of women during their maternity cycle a.2. Understand the bio-psychosocial phenomena of pregnancy, labor and puerperium a.3. Summarize nursing care during maternity cycle. a.4. Discuss the different items of health education for women during the maternity cycle	أ- المعلومات والمفاهيم:
b.1. Utilize the basic concepts in the provision of care for women during their maternity cycle b.2. Identify topics for nursing research related to women during their reproductive life b.3. Describe the different steps of the nursing process b.4. Describe the necessary care of the newborn b.5. Identify deviation from normal during maternity cycle b.6. Determine community services and resources helpful to women	ب. المهارات الذهنية

<p>during their maternity cycle</p> <p>b.7. Identify obstacles hindering the provision of care to women during their maternity cycle</p>	
<p>c.1. Apply the nursing process to care of women during the maternity cycle</p> <p>c.2. Conduct 20 normal deliveries correctly</p> <p>c.3. Cut and repair 10 episiotomies</p> <p>c.4. Plan and provide the necessary care of the newborn</p> <p>c.5. Observe any deviation from normal during maternity cycle</p> <p>c.6. Educate women in matters related to their needs during the maternity cycle</p> <p>c.7. Develop a nursing care plan for women during the maternity cycle</p> <p>c.8. Suggest community services and resources helpful to women during their maternity cycle</p> <p>c.9. Make the necessary referral for women during their maternity cycle</p> <p>c.10. Record and report relevant information related to women during their maternity cycle</p>	<p>ج. المهارات المهنية الخاصة بالمقرر</p>

أ- المعلومات والمفاهيم

- a.1 Identify the anatomy of female organ
- a.2 Discuss the physiology of conception , pregnancy and antenatal care
- a. 3 Discuss the high risk pregnancy and ante partum hemorrhage.
- a. 4 Discuss the normal labor
- a.5 List the abnormal labor
- a.6 Discuss normal puerperium
- a.7 predict the abnormal puerperium
- a.8 Relate types of STDs and PIDs
- a.9Discuss menopause
- a.10 Paraphrase the displacement
- a. 11 Identify the infertility
- a.12 Explain genital injury and fistula
- a.13 describe Neoplasia

ب. المهارات الذهنية

- b.1 Define external female organs
- b.2 Enumerate internal female organs
- b.3 define pelvic floor muscles
- b.4 Interpret the supportive ligaments
- b.5 Identify physiology of conception , pregnancy and antenatal care
- b.6 Trace the high risk pregnancy
- b.7 Explain the early ante partum hemorrhage
- b.8 specify the late ante partum hemorrhage
- b.9 Predict the management of ante partum hemorrhage
- b.10 Enumerate the characteristics of normal labor
- b.11 Assess the factors affecting normal labor
- b.12 Predict the management of normal labor
- b.13 Specify types of abnormal labor
- b.14Analyze the management of abnormal labor
- b.15 Analyze the management of normal puerperium
- b.16 Analyze the management of abnormal puerperium
- b.17 Analyze STDs and PIDs
- b.18 Analyze the management of menopause
- b.19 Assess the displacement
- b.20 Predict the management of infertility

<p>b.21 Specify types of genital injury and fistula b.22 Analyze the management of Neoplasia</p>

1- بيانات المقرر

الرمز الكودي: 703EI11	اسم المقرر: Pharmacology in obstetric	الفرقة / المستوى: Master's Program, Specialty Course
التخصص: Obstetric & Gynecologic Nursing	عدد الوحدات الدراسية: نظري 2 ساعة عملي 0 ساعة	

2. هدف المقرر

This course presents the general principles of pharmacological managements. It focuses on the pharmacological management of normal and abnormal pregnancy , labor ,and puerperium as well as menstrual and infertility problems . special emphasis is directed toward action, dose, route of administration ,side effects ,indication and contraindication of the most commonly used drugs in the field

3. المستهدف من تدريس المقرر:

أ- المعلومات والمفاهيم:

- a. 1. Recognize general principles of pharmacological management
- a. 2. List pharmacological management of diabetes mellitus during pregnancy
- a. 3. List pharmacological management of selected endocrine disorders during pregnancy
- a. 4. Recognize pharmacological management of anemia and thrombocytopenia in pregnancy
- a. 5. list pharmacological management of hypertensive disorders of pregnancy
- a. 6. List pharmacological management of cardiac disorders during pregnancy
- a. 7. Recognize precautions for anticoagulant therapy during pregnancy and lactation
- a. 8. List pharmacological management of gastrointestinal and hepatic diseases and pregnancy

<p>a. 9. Recognize pharmacological management of selected infections during pregnancy</p> <p>a.10. List pharmacological management of rheumatic and related illnesses in pregnancy</p> <p>a. 11.
